ABOUT ME

I am an informatics engineer with 4 years of experience in the area of front-end developer using technologies like HTML, CSS3, JavaScript, JQuery, and Bootstrap 4 and 5. I am currently learning React. I have a good disposition, adaptability to the new environment, I am also very planned, and organized person. I have great communication skills, and I accept criticism and feedback positively in order to learn and improve my professional career. I am also an empathic person and can stabilize good relationships.

RELEVANT EXPERIENCE

Front End Developer

Multiplica (External employee for Entel), Santiago | 2022 - currently

My principal functions in the company are:
